PROJECTS

CleanReport: Community Waste Reporting Platform 2023-Aug

Summary:

CleanReport is an innovative web-based platform designed to empower communities to combat litter and waste in their neighborhoods. The project features a user-friendly interface that allows residents to easily report instances of garbage by uploading photos and providing location details.

Tic-Tac-Toe: Classic O/X Game

2024-jul

Summary:

Summary: Developed a console-based Tic-Tac-Toe game in C++ that allows two players to compete by placing their marks (O or X) on a 3x3 grid. The project includes user input handling, game logic to check for wins or draws, and replay functionality. This project enhanced my programming skills and understanding of fundamental concepts such as loops, conditionals, and arrays.
